IN THE HOTEL LIKE AT HOME

A complete offer for a state of the art electric system also in the hotel room

> Maximum attention to customer requirements in terms of:
- available services
- comfort
- simple interaction with products and functions.

The BTicino Hotel range has been conceived for pleasant hotel stay, making guests feel as if they were in their own homes.

Inside the room: "do not disturb – make up the room" pushbuttons, and supply badge pocket (network ON)

IMMEDIATELY AT EASE

The presence of a badge holder socket invites the guest to immediately interact with the room services on offer.
To be left undisturbed simply press the "do not disturb" control.

BEDSIDE PANEL

Path Markers Light

Emergency light

EACH FUNCTION CAN BE RECOGNISED IMMEDIATELY

A range of simple and intuitive symbols make each control recognisable and, and make it easier for the customer to interact with the available functions.

Curtain adjustment, Bedside and Master lights management

CONNECTION, ENTERTAINMENT, AND MULTIMEDIALITY

A range of products dedicated to audio/video connections provide the desired level of entertainment and relax.

HDMI and USB connector for managing readers and electronic devices such as DVDs, digital cameras, MP3 readers

TECHNOLOGY AND FLEXIBILITY IN THE OFFICE

The whole network at your fingertips: from electric distribution to the structured cabling for the management of data and audio/video signals

MAXIMUM INTEGRATION

LIVINGLIGHT can be installed in all the Interlink solutions: column, workstations, protruding towers and underfloor boxes.

Pop up

Workstation

Desk workstation

New RJ45 toolless connectors

Wi-Fi Access Point

MEETING ALL CONNECTION NEEDS

Full design coordination of LIVINGLIGHT with various systems:
- BTNET, structured cabling system
- distribution of data and audio/video signals
- wireless extension of the data network with Wi-Fi Access Point.

*Green Switch/ Audio and video connectors/ Dimmer*

GREEN SWITCH AND ELECTRONIC CONTROL DEVICES

L4433N   N4434N

L4432   NT4431

Item	GREEN SWITCH	
☐ **N4433N** ▨ **NT4433N** ■ **L4433N**		Green Switch: switch with movement sensor, through a combination of **passive infrared rays and ultrasounds**, and brightness sensor. Manual switching on of the light using the front pushbutton, and automatic switching off based on brightness levels and movement. Switch off delay and brightness sensor threshold adjustable using the one/two-way (BMSO4003 and BMSO4001) remote control, 230 Va.c. power supply.- 2.5 A relay output – 2 modules
☐ **N4434N** ▨ **NT4434N** ■ **L4434N**		Green Switch: switch with passive infrared movement sensor – brightness sensor with adjustable threshold and adjustable switch off delay time - manual switching on of the light using the front pushbutton, and automatic switching off based on brightness levels and movement – 2.5 A resistive/inductive relay output – 230 Va.c. power supply - 2 modules
○ **BMSO4001**		two-way IR remote control for the selection of the N/NT/L4434N sensor parameters. The device is fitted with a display for the acquisition of the currently set values, and the modification of the main parameters, such as: brightness level, switch off delay time, operating mode and sensitivity.
○ **BMSO4003**		one-way IR remote control for the selection of the N/NT/L4434N sensor parameters. It enables the selection of the main parameters, such as: brightness level, switch off delay time, operating mode and sensitivity.

NOTE: for more information on remote controls BMSO4003 and BMSO4001 refer to the Lighting Management Catalogue.

Item	PASSIVE IR SWITCHES	
☐ **N4431** ▨ **NT4431** ■ **L4431**		switch with passive IR movement detector – adjustable threshold twilight circuit with possibility of exclusion – switch off time delay circuit, adjustable from 3 seconds to 10 minutes – relay output 2 A resistive / 2 A inductive – power supply 230 Va.c. - 1 module
☐ **N4432** ▨ **NT4432** ■ **L4432**		as above – switch off delay time circuit, with delay adjustment from 30 seconds to 10 minutes - it can also be activated using the external pushbutton - relay output 6 A resistive/2 A inductive - with O-A-I selector - power supply 230 Va.c.- 2 modules

NOTE: ☐ **White** colour device   ▨ **Tech** colour device   ■ **Anthracite** colour device   ○ Neutral item

GREEN SWITCH: ILLUMINATION ONLY WHEN NEEDED

Green Switch is the intelligent solution for **managing lighting without waste** in the residential and service sectors.

ECO MODE
The load is switched on manually and switched off automatically by the sensor, depending on the daylight level and the presence detection.
UP TO
55%
SAVINGS

IN COMPLIANCE WITH
EN15193 STANDARD

You choose to switch on the light

DIMMERS
For an efficient management of all types of loads

NEW

NEW UNIVERSAL DIMMER

With the new BTicino universal dimmers it is possible to control and adjust the light intensity of all types of loads on the market, from traditional incandescent lamps, to the latest generation LED and CFL energy saving lamps that, as required by the regulations, will soon replace them.

COMFORT:
- thanks to the new universal dimmer, it is possible to adjust the light intensity, obtaining the optimum light conditions for each situation
- its ergonomics and the user interface are simple and intuitive, with dedicated pushbuttons for switching on/off, and -/- level adjustment
- a simple touch is enough to switch the light on at a preset level (33% or 66%)

INSTALLATION ADVANTAGES:
- thanks to the possibility of managing all kinds of loads, the device may be installed before selecting the lamps
- wiring only requires 2 wires (no neutral wire necessary), saving time during the installation
- as the neutral is not necessary, it can be easily installed in replacement of traditional existing dimmers or controls
- it can be controlled by one or more remote pushbuttons

	USB CHARGER
□ N4285C1 ◼ NT4285C1 ◼ L4285C1	USB connector 5 Vd.c. to recharge electronic devices as mobiles, smartphone, tablet and similar, up to 1,100mA. Power supply 230 Va.c.
□ N4285C2 ◼ NT4285C2 ◼ L4285C2	USB connector 5 Vd.c. to quick recharge of a single electronic devices as mobiles, smartphone, tablet and similar, up to 2,400 mA, or simoultaneus recharge o two devices up to 1,200 mA. Power supply 230 Va.c.

	INDUCTION CHARGER
○ LN4285CW2	Induction charger, with 2.400 mA USB charging port. It allows fast and wireless charging of smartphones equipped with an induction receiver. Suitable for bed head, sideboards, desks, work environments. Complies with the WPC QI standard (World Power Consortium) and the EN62479 standard (ECM emission). It meets the needs of people's protection in the field of electromagnetic fields and does not disturb other radio transmissions (Zigbee, TNT, GSM 4G, ...). It is equipped with 2 50x80 mm induction antennas that guarantee a quick coupling of the smartphone. The anti-slip surface is inclined by 10 °. Anti-theft "lock" function. Energy efficiency> 85%. Equipped with a 2400 mA typa A USB port to power a second device. 12W. Size 136.5 x 70 x 56.5 mm

HOTEL OFFER RANGE

This page lists the devices specifically intended for hotel room services.

The BTicino hotel room offer range, and in more general terms for the hotel sector, includes however many more devices that are also used in other sector, and are therefore listed in various sections throughout this catalogue.

Some of them are, for example:

- comfort devices = light, curtain, and scenario controls with dedicated symbols. Also, thermostats and temperature probs with knobs.

- audio and video devices = connectors for every need and sound signalling devices

- safety devices = step lights and emergency lamps.

L4545   LN4549   NT4547   N4033   N4177   N4373H   N4028H

| Item	BADGE-HOLDER POCKET	
○ LN4549		badge holder pocket for the power supply inside the hotel room - slot light with built-in lamp - 30 second switch-off delay - power supply 230 Va.c. - 2 modules - to be completed with front cover in the desired look
○ LN4548		badge holder pocket for the power supply inside the hotel room with RFID technology recognition - slot light with built-in lamp - 30 second switch-off delay - power supply 230 Va.c. - 2 modules - to be completed with front cover in the desired look

	FRONT COVERS FOR BADGE-HOLDER POCKETS	
□ N4547 ▪ NT4547 ▪ L4547		front cover for traditional or My Home badge-holder pocket - the installation is compatible with 2 module boxes only
□ N4551 ▪ NT4551 ▪ L4551		front cover for traditional or My Home badge-holder pocket - 3 modules

Item	LAMPHOLDER FOR OFF-DOOR SIGNALLING	
□ N4373H ▪ NT4373H ▪ L4373H		off-door lampholder with double optical signalling: do not disturb and make-up the room – use 2 LEDs item LN4742V12T (12 V)

| □ N4028H
▪ L4028H | | changeover switch 1P 16A - 250V a.c. double pushbutton 1-0-2 for Hotel installation - room condition indication: "PLEASE DO NOT DISTURB" and "PLEASE MAKE UP THE ROOM". To use with pilot light item. Items conform to BS EN 60 669-1 |

	SHAVER SOCKETS	
□ N4177 ▪ NT4177 ▪ L4177		shaver socket with insulation transformer - input voltage 230 Va.c. @ 50/60 Hz - output voltage 115/230 Va.c. 20 VA

***Note:** when installed with Livinglight AIR, the use of the box extension is necessary, in order to make easy the wiring

	CORD PUSHBUTTONS	
□ N4033 ▪ NT4033 ▪ L4033		cord pushbutton 1 P NO 10 A for bathroom alarm

CONTROL BACKLIGHTING LED CONNECTION

Note for the connection of 230 V.a.c. LEDs for the backlighting of control devices: when LEDs are fitted to help locate the control itself, it must be taken into account that energy saving and fluorescent lamps do not allow in series connection of the LED on the load.
It is therefore necessary to also take a neutral conductor near the control, so that the LED may be connected directly between phase and neutral, and will always be on.
EXAMPLES OF LED CONNECTION ON A SWITCH

function: load status LED

function: locating

LIVING·LIGHT

can be installed using normal flush mounted
boxes and 2, 3, 4, 7, and 3+3 module supports.
The light point can be completed with square
or round cover plates depending on personal
taste.

LIGHT AIR

LIVINGLIGHT AIR features reduced protrusion
from the wall of the device/cover plate.
- 3, 4, 7 and 3+3 module installation: traditional
  BTicino flush mounted boxes (503E), or boxes
  with minimum depth 50 mm.

Suggestions:
- new systems: considering the back position
  of the mechanisms inside the boxes, for
  masonry walls the use of box extensions is
  recommended, for better comfort and wiring
- existing systems: check that the depth of the
  box is at least 50 mm.
